

ForceX™ powered by ThermoDynamic Compression (TDC) technology delivers intelligent alternating heat and cold with dynamic positive compression — combining temperature control and adjustable pressure in one clinically optimized device. Designed for recovery in both clinic and home settings, ForceX™ maintains precise temperatures and compression levels to help manage swelling, promote comfort, and support circulation. Its ice-free design eliminates messy refills, while the ergonomic compression sleeves and portable system let you bring pro-level recovery anywhere you need it.

Introducing TDC Tech™ ThermoDynamic Compression

Targeted Pressure Modes:
Kneading, pulsing, and sustained compression for custom recovery

Variable Compression Levels:
30–120 mmHg for precise comfort and performance needs

True Dual-Phase Therapy:
Independent control of hot and cold ranges in one session

Rapid Transition System:
Switch from cold to heat in under a minute

Ice-Free Cryothermic Design:
No ice, no water mess, no downtime

Touchscreen Smart Control:
Pre-set programs and manual adjustments at your fingertips

ForceX™: Heat. Cold. Compression.

ThermoDynamic Compression (TDC) System

Whether used for recovery after activity, post-surgery care, or rehabilitation routines, ForceX™ combines targeted heating, cooling, and adjustable compression to help manage pain, reduce swelling, and support the recovery process—without ice or complicated equipment.

Specifications:

Dimensions:
10.7 in × 6.7 in × 12.9 in

Weight: ~11.7 lbs

Display:
4.3" color LCD touchscreen

Water Tank Capacity:
600 ml (distilled water only)

Power Supply:
100–240V AC, 50/60 Hz

Umbilical Hose Length:
2 m with integrated 3-in-1 connectors

Cold Therapy Range:
41–59°F (adjustable in 1°F increments)

Heat Therapy Setting:
Fixed at 104°F

Treatment Time:
5–90 min, adjustable in 5-min increments

Compression Modes:
Squeeze, Knead, Relax

Compression Levels:
Gentle (40 mmHg),
Moderate (70 mmHg),
Strong (100 mmHg)

Auto Power-Off:
After 5 minutes of inactivity

Components:

Control Unit with Integrated Water Tank (600 ml)

Therapy Sleeve (size and model may vary) Universal

Umbilical Hose Assembly with 3-in-1 Connectors

Power Adapter with Cord (100–240V AC, 50/60 Hz)

Umbilical Hose Drain Adapter Connector

Fill Container

Carry Bag for Storage and Transport

Quick Reference Guide/User Manual

Features & Details

Water compress 5°C–40°C
enjoy iceless cold

Power adapter connected
100V~240V

Therapy Made Simple

Key Features:

Customizable Compression Therapy: Multiple compression modes—including kneading and dynamic cycles—with adjustable intensity levels to match your recovery needs.

Full Temperature Control: Wide cold range and targeted heat settings to adapt to every phase of recovery.

Positive Pressure Performance: Maintains consistent compression for optimal comfort and circulation support.

Ice-Free Technology: No melting, no mess—just consistent, controlled cooling and heating without ice.

Smart Touchscreen Interface: Simple, intuitive controls with built-in software to easily select programs and settings.

Adaptable Design: One system fits multiple body regions, reducing the need for multiple sleeves or devices.

Applications:

ForceX™ with ThermoDynamic Compression (TDC) is built for when recovery can't wait. Whether in the clinic or at home, it delivers precision-controlled heat, cold, and compression in one easy-to-use system. From post-surgery and orthopedic rehab to the toughest days in sports medicine, its ice-free, adaptable design keeps recovery moving—helping you manage swelling, improve comfort, and get back to peak performance with confidence.
