

Pulse Cold Compression Therapy System

Intermittent compression has been proven to be more effective than static compression because it moves the blood more effectively, helping push the swelling out of the system. VASTLAND® designs to combine the benefits of intermittent pneumatic compression and cold therapy to enhance lymphatic function, encourage blood flow, and to help stimulate tissue repair faster and better.

- 1 Intermittent compression and cold therapy
- 2 Simplicity in design & easy to operate
- 3 Preset 9 menus of pressure and time

AC Adaptor(Included)

Hose(Included)

Drain Gadget(Included)

Portable Bag(Optional)

Specifications

Part Name	Control unit
Part Code	KRP/MYY-(M)
Input Voltage	100-240V, 50/60Hz
Output	12V, 2A
